Joshua Sevy

Senior Software Engineer | Lead Software Engineer @ Spectrum
Englewood, Colorado, United States

Summary

Navigating the software development landscape at Spectrum, my role as a Senior Software Engineer hinges on providing technical guidance and fostering a team environment conducive to innovation. With proficiency in Angular, Ionic, and modern micro front-end architectures, the focus is on crafting superior software solutions that enhance user engagement and operational efficiency.

The transition from Software Engineer to a leadership position within the company underscores a commitment to continuous improvement and mentoring. Our team's expertise in centralized authentication and federated systems reflects a dedication to delivering robust, cross-platform applications, emphasizing a user-centric approach and meticulous attention to detail in project planning and execution.

Experience

Spectrum
4 years 1 month

Senior Software Engineer
March 2023 - Present (2 years)
Denver, Colorado, United States

As a Senior Software Engineer and Lead Software Engineer, I am responsible for mentoring and supporting the team in their day-to-day activities. My technical expertise includes working with Angular, Ionic, and Mod Fed Micro Front Ends to deliver high-quality software solutions. Additionally, I am involved in project planning and architecture, ensuring that our development process is efficient and effective. In my leadership role, I provide guidance to team members and help to create a positive and collaborative work environment. Through my experience and expertise, I am able to contribute to the success of the team and the organization as a whole.

Software Engineer
November 2021 - March 2023 (1 year 5 months)
Denver, Colorado, United States

Current team manages our account support portions of application including centralized authentication, multiple module federated micro-front ends, as well as multiple internal technologies. Teams are cross platform working in web as well as mobile development using xamarin.

Key Responsibilities:

- Lead the development and maintenance of front-end applications using Angular, RXJS, NGRX, and GraphQL
- Write clean, efficient, and well-documented code that is maintainable and scalable
- Collaborate with cross-functional teams to identify and prioritize user requirements and design solutions that meet business needs
- Ensure the technical feasibility of UI/UX designs and provide feedback to improve user experience
- Participate in code reviews and provide feedback to improve code quality
- Test and debug front-end applications to ensure they are error-free and meet user requirements
- Stay up-to-date with emerging trends and technologies in front-end development
- Mentor junior and mid-level team members and provide technical guidance as needed
- Drive technical discussions and provide technical leadership across teams
- Participate in agile development methodologies and contribute to continuous improvement of the development process
- Continuously identify and implement process improvements to enhance team performance and development efficiency

Software Developer II
February 2021 - November 2021 (10 months)
Greenwood Village, Colorado, United States

As a Software Engineer II - Front End Developer, you will be responsible for developing and maintaining the front-end of our software applications, with a focus on Angular, RXJS, and NGRX. You will work collaboratively with cross-functional teams to deliver high-quality, responsive, and user-friendly web applications that meet the needs of our organization and customers. This role requires a strong understanding of front-end development principles, as well as experience with modern front-end technologies and frameworks.

Key Responsibilities:

- Revised, modularized and updated old code bases to modern development standards, reducing operating costs and improving functionality.
- Participated in cross-functional projects while working in lean development environments.
- Documented technical workflows and knowledge in private wiki for education of newly hired employees.
- Develop and maintain front-end applications using Angular, RXJS, NGRX, and GraphQL
- Write clean, efficient, and well-documented code that is maintainable and scalable
- Collaborate with cross-functional teams to identify and prioritize user requirements and design solutions that meet business needs
- Ensure the technical feasibility of UI/UX designs and provide feedback to improve user experience
- Participate in code reviews and provide feedback to improve code quality
- Test and debug front-end applications to ensure they are error-free and meet user requirements
- Stay up-to-date with emerging trends and technologies in front-end development
- Mentor junior team members and provide technical guidance as needed
- Participate in agile development methodologies and contribute to continuous improvement of the development process

Turing School of Software & Design
Software Engineer
April 2020 - February 2021 (11 months)
Denver Metropolitan Area

At Turing I work in various Languages and Frameworks such as:
- Frameworks: React.js, Angular 11, Express.js
- Languages: TypeScript, JavaScript, HTML5, CSS, Sass, SQL
- Others: PostGres, Postman, Node.js, Git, GitHub, MongoDB
- Goals : Keep learning something new everyday and continuing to grow personally and professionally

FasDesk Inc
