

Joshua Sevy

Technical Manager & Full-Stack Engineer

Englewood, Colorado | joshuasevy@outlook.com | 720-257-2576 | linkedin.com/in/joshua-sevy | github.com/JoshSevy

SUMMARY

Technical Manager and full-stack engineer who leads as a player-coach: managing a blended onshore/offshore engineering team while staying hands-on in the codebase through architecture, code delivery, and mentorship. Recently focused on driving a large-scale Angular modernization and building AI-assisted engineering workflows that help teams ship consistently without bottlenecking on any one person. Background spans hospitality management to software engineering, bringing a people-first approach to technical leadership.

EXPERIENCE

Technical Manager | Spectrum

March 2023 – Present | Denver, CO

- Lead a blended onshore/offshore engineering team as a player-coach, staying hands-on through architecture, code delivery, and defect resolution while providing technical direction and mentorship.
- Architected and drove a large-scale Angular modernization strategy (standalone components, signals, `inject()`, OnPush change detection), retiring a significant volume of legacy code and improving maintainability and performance.
- Built and scaled AI-assisted engineering workflows, including reusable AI-driven tooling, automated quality gates, and documentation, enabling engineers to ship consistently without bottlenecking on a single person.
- Led technical investigations that shaped engineering strategy across mobile integration, video platform evaluation, authentication, and regulatory compliance.
- Restructured team workflows and introduced quality-ownership practices to reduce QA bottlenecks and improve delivery throughput.
- Deliver cross-team training on AI-assisted workflows, Apollo GraphQL, and modern Angular patterns; mentor engineers into architectural ownership.

Senior Software Engineer | Spectrum

November 2021 – March 2023 | Denver, CO

- Led development and maintenance of front-end applications using Angular, RxJS, NgRx, and GraphQL across centralized authentication and federated micro-frontend systems.
- Collaborated cross-functionally to scope solutions, validate UI/UX feasibility, and drive continuous improvement of the development process.
- Mentored junior and mid-level engineers and provided technical guidance across teams.

Software Developer II | Spectrum

February 2021 – November 2021 | Greenwood Village, CO

- Modernized legacy codebases to current development standards, reducing operating costs and improving functionality.
- Developed and maintained front-end applications using Angular, RxJS, NgRx, and GraphQL; documented technical workflows for new hires.

Software Engineer | Turing School of Software & Design

April 2020 – February 2021 | Denver, CO

- Built applications across React, Angular, and Express; strengthened fundamentals in TypeScript, JavaScript, SQL, and Git-based collaboration.

Software Engineer | FasDesk Inc

October 2020 – January 2021 | Colorado Springs, CO

- Built a ground-up Angular 11 application with Microsoft B2C OAuth authentication and guarded routes, integrating multiple .NET API endpoints.
- Partnered directly with the CTO to establish project goals, projections, and milestones.

Managing Partner | The Tatarian

November 2017 – March 2020 | Denver, CO

- Managed an award-winning restaurant/bar concept, leading high-performance teams, driving significant revenue growth while reducing operating costs, and maintaining industry-leading team retention.

Prior Experience: Hospitality management and service roles, 2008–2017 (Arvada Tavern, Table To Tavern, Richard Sandoval Restaurants, Hollywood Theaters): bartending, beverage management, and general management, including multi-unit operations and staff training.

CORE COMPETENCIES

Leadership & Process	Player-Coach Team Leadership, Mentorship & Coaching, Cross-Functional / Offshore Collaboration, Technical Strategy & Architecture, Process & Quality Ownership, Technical Training & Enablement
Technical	Angular (Signals, Standalone Components, OnPush), TypeScript, RxJS, NgRx, GraphQL (Apollo), Ionic, Micro Frontends, Node / Deno, AI-Assisted Engineering & Agentic Tooling, Datadog, Splunk Enterprise, Jest / Jasmine, Python

EDUCATION

Southern New Hampshire University, B.S. Computer Science (*In Progress, Expected 2027*)

Turing School of Software & Design, Front-End Development Certificate, 2020

Certifications: Agile Software Development, Learning RxJS
